

## **Health & Safety at Work**

We are dedicated to ensuring that any staff or subcontractors employed by us, will work in a safe environment and limit the risks of accident or damage to a minimum.

We value people and want them to work confidently and comfortably, concentrating on the tasks they perform and the results they achieve.

We will ensure that they will work to an optimum level of Safety and Risk Management, commensurate with cost, as opposed to a minimum set of standards.

This should clearly be in evidence from the provision of our products and services at all times.

Peter Ridley
