

## Pedal bin 30 litre – Assembly Instructions

- 1) Turn the bin upside down and insert the lugs of the pedal into the two holes in the recessed part of the base of the bin, making sure the pedal tread is facing in the right direction.
- 2) Turn the bin upright again and connect the pedal to the lower end of the lattice imprinted bar. Note the difference between the front and the back of the bar, as shown on the diagram. Place the lid loosely on the top of the bin and connect the lugs at the top of the bar to the two forward holes in the lid.
- 3) To fit the lid, locate one of the lid holes onto one of the matching lugs on the body of the bin, holding the lid slightly at an angle to aid location. Then repeat this action on the other side until the lid is snapped on and securely located onto both lugs.
- 4) Locate the lid fixing pins on both sides and push in with your fingers or knock into place with a plastic hammer until the head of the pin is fully home.
