art.	dimensions cm	capacity L
02028	31x14,5x21,7H	5,5

Filter your waste oil with the special accessories

Easy to transport

Take it to authorized collection centres or ecological islands

ECOHOUSE® LIGHT is a 5.5 litre container for separate collection of domestic used cooking and frying oils. The capacity is sufficient to fill with used vegetable cooking oil from a domestic deep fat fryer. Manufactured in lightweight HDPE and easy to handle, the lid has a child proof safety cap (UNI EN ISO 8317: 2005 compliant) and is also designed to hold a microchip inside the cap for data monitoring of oil collection. A funnel with removable built-in filter, improves the quality of separated used oil and it has a special housing, to secure the funnel to the container after use. The practical shape allows for easy storage in a cupboard or on the kitchen worktop.

Options:

A panel for vinyl labels or imprinting e.g. customer logo. Insertion of a microchip into the cap.

Filter the used oil when filling

Safe and easy to carry

Take the Oli to authorised collection points

OLI is a 3.5 litre container for the separate collection of domestic used cooking, frying and salad oils. Manufactured in lightweight HDPE and easy to handle, the lid has a child proof safety cap (UNI EN ISO 8317: 2005 compliant) and a removable filter housed inside the opening, to improve the quality of separated used oil. OLI has a small footprint for easy storage in a cupboard or on the kitchen worktop and is a great addition to any household's recycling system. The cap is designed for the insertion of a microchip, for data monitoring of oil collection.

Options:

A panel for vinyl labels or imprinting e.g. customer's logo. Insertion of a microchip into the cap.

LID TO IMPROVE SAFETY & QUALITY OF USED VEGETABLE OIL COLLECTION IN A DRUM

■ cover yellow or black color
■ special colour customizations are available upon request

art.	dimensions cm	capacity L
02504/120V	50x50x20H	/

Opening with an Anti-overturning cap

Funnel with an integrated filtering grid

Level gauge

The H-OLI lid, made from weather-resistant PP, has been designed to increase user safety to allow collection and emptying of separated used vegetable cooking oils.

The wide aperture lid includes an inset removable filter, an optional anti-odour filter with air breather and an anti-spill valve with self-locking system, in case of over filling or accidental overturning. The hinged lid is designed to prevent it from being left open and a lid clamp hermetically seals the lid to the body, to prevent rainwater from entering the container.

The H-OLI lid can be applied to various existing sizes of plastic drums, with capacities and diameter (120 litres/395 cm, 125 litres/395 cm, 133 litres/395cm, 162 litres/395 cm).

Options:

Lock with universal key; electronically controlled aperture lock, odour filter (lasting approx. 2 years), vinyl labels

LID TO IMPROVE SAFETY & QUALITY OF OIL COLLECTION AND INSECT CONTROL

■ cover yellow or black color
■ special colour customizations are available upon request

art.	dimensions cm	capacity L
02173	32x25x12H	/

The NCP lid, made in weather-resistant PP, has been designed to increase the safety of bulk bins or banks used for the separate collection of used vegetable oil contains or glass, cans, paper and plastics etc., with optional colour coding of the lid for waste differentiation. The NCP lid is adaptable to fit most existing containers including wheeled bins. It features an anti-tip and spill mechanism, which prevents the lid from remaining open, a lid to body clamp, which hermetically seals the cover in order to prevent rainwater from entering the container and resulting in the potential overflow of polluting liquids onto the surrounding area. It also contributes to insect control, by preventing a natural breeding habitat of stagnated water inside the container.

Options:

Lock with universal key, electronically controlled lid aperture lock, odour filter (lasting approx. 2 years), colour coding and vinyl labels.

OLIVbox²⁴⁰

art.	dimensions cm	capacity L
02177/V	D.100xL.140x H235	240

CONTAINER FOR COLLECTING PET PLASTIC BOTTLES CAPPED AND SEALED FULL OF USED COOKING OIL, WITH AN INTERIOR CONTAINER YOU CAN EXTRACT NO LOOSE OIL

Insert the bottle, sealed closed inside the aperture

Equipped with inner container trolley

Simplifies emptying when nearly full, rather than nearly empty

OLIVBOX 240 is a container for the separate collection of used cooking oil contained in well-sealed plastic bottles - no loose oil. The collection container is composed of two containers, one inside the other; the interior one has a capacity of 240 liters and can be easily extracted for collection as it is on wheels.

The inner wheeled container, once filled, is easily removable and replaceable with an empty one. You can wheel it out from the back of the bigger one through a service door fitted with lock.

OLIVBOX 240 is made of HDPE plastic suitable for resisting UV light, wind and weathering and can safely contain the collected oil. Additionally, it can be secured with two side mounted vertical posts for ground fixing, to avoid spills by caused by accidental impact damage or overturning in very strong winds.

Optional: Corporate and Personalized vinyl labels.

EcoHouse^{Small}

tank green color_special colour customizations are available upon request

art.	dimensions cm	capacity L
02042	12,5x16x25,5H	2,2

CONTAINER FOR USED VEGETABLE COOKING OILS

Pouring waste oil in drainpipes is highly polluting

Filter and collect with the special funnel

Handy and small

ECOHOUSE® SMALL is a 2.2 litre container for the separate collection of domestic used vegetable cooking oils. The capacity is ideal for the collection of shallow frying oils and salad oils.

Manufactured from lightweight HDPE and easy to handle, the lid has a child proof safety cap (UNI EN ISO 8317: 2005 compliant) with a funnel with built-in filter grill to improve the quality of the separated used oil. ECOHOUSE® SMALL is also designed to hold a microchip inside the cap, for detailed monitoring of oil collection. The funnel has a special housing to attach it to the container after use.

Its shape, footprint and size are suitable for any type of kitchen or environment and the container can stand upright or on its side.

Options:

A panel for vinyl labels or imprinting e.g. customer's logo. Insertion of a microchip into the cap.

OILplan™

WEB MANAGEMENT SYSTEM FOR RECOVERING RECYCLABLE WASTES

OILPLAN™ is a web based system for managing and monitoring the collection of domestic and commercial waste resources.

It is a service available through the internet from a PC, Laptop or Smartphone, creating an "intelligent" reception container fitted with an electronic card NCP, giving management control resulting in a much more efficient waste collection service.

THE SYSTEM IS APPLICABLE TO DIFFERENT TYPES OF WASTES, BOTH SOLID AND LIQUID.

OILPLAN™ can be specially customized on our bulk collection bunker OLIVIA, for the collection of used vegetable oil produced by households or catering outlets.

OILPLAN™ is a simple and innovative system used by collection Contractors, Municipalities or Utilities to remotely monitor bunkers located in their locality. This allows managers to prioritize the frequency of collection and the efficiency of the vehicle round, while giving citizens information concerning availability of each bunker at any given time.

For further information visit our web site : www.raccoltaoliusati.com

Separate used vegetable oils into the canister ECOHOUSE fitted with a micro-chip (tag) in the cap.

Access the OILPLAN™ system on the web to find the nearest OLIVIA bunker and check its status (full or empty)

Place the microchipped cap of the canister on the electronic reader on the OLIVIA bunker to unlock its filler aperture

Empty used vegetable oil into the OLIVIA bunker

colibri

art.	dimensions cm	capacity L
02510	9,6x9,6x25,4H	1,6

CONTAINER FOR USED VEGETABLE COOKING OILS

Filter the used oil when filling

Small, handy and compact, ideal for those having little room

Safe and easy to carry

COLIBRI is a 1.6 litre container for the separate collection of domestic used vegetable cooking oils. The capacity is ideal for the collection of salad oils or shallow frying oils.

Manufactured from lightweight HDPE and easy to handle, it includes a child proof safety cap (UNI EN ISO 8317: 2005 compliant) and a removable filter located in a recess in the opening, to improve the quality of the separated oil. Its small size allows easy placement within a sinks for practical oil collection and storage in a cupboard or kitchen worktop.

The cap is designed for the insertion of a microchip, for data monitoring of oil collection.

Options:

A panel for vinyl labels or imprinting e.g. customer's logo. Insertion of a microchip into the cap.

Tasselli e adesivi personalizzati; Tag attivo e/o passivo per riconoscimento utente.

TANK FOR THE COLLECTION AND STORAGE OF VEGETABLE OIL FROM INDUSTRIAL CANTEENS AND FROM THE CATERING SECTOR

36L

It simplifies the disposal of waste cooking oil coming from fryers

The trolley handle makes any move easier even when full

It can be stacked for a better positioning (maximum stackable quantity: 4 tanks)
Easy and safe fastening through loading fixing belts

ECO-WORK® is a versatile and convenient TANK designed for the collection of BIG quantities of Waste Vegetable Oil. Thanks to its features the collection and storage of oil is safe, easy and quick, directly on the workplace. ECO-WORK® has a maximum capacity of 36 litres, is WHEELY and has a TROLLEY handle that makes its transport extremely SAFE also for the health of the carrier.

It is available in GREEN for the SELECTIVE COLLECTION OF VEGETABLE OIL. It also has a central HANDLE to LIFT it and STACK it * making the most of any available space. Its versatility allows oil COLLECTORS to SUCK oil directly on the spot or to take it to specific collection and/or storage centres. The transport is absolutely safe and easy thanks to a specific casing that SAFELY fixes Eco-Work through some BELTS preventing its OVERTURNING.

*Maximum stackable quantity allowed when full: n° 4 pieces for a total of 144 litres.

Optional:
Customizable plates
Customizable stickers

COLLECTION POINT H-OLI

115L

Equipped with integrated filter and float level gauge

Large opening for easy oil filling

Optional lock with universal key

H-OLI is a container for the communal collection of used vegetable cooking oil from apartment blocks and other public collection points.

The drum is made in weather-resistant HDPE, it is washable and recyclable at the end of its useful life.

The container is provided with a H-OLI lid for practical and safe collection of used vegetable cooking oils.

The filling aperture includes a wide funnel with recessed filter and an anti-spill safety valve to reduce and stop the flow, in the event of accidental overturning, it also prevents overflowing.

It also has an optional odour filter (lasting approx. 2 years) and a float level gauge. The H-OLI collection container is supplied with a secondary lid that makes the container UN/RID/ADR approved for safe transport.

Options:
H-OLI Kit, Oil Only 120 Platform, lock with universal key, vinyl labels.

FUNNEL FOR COLLECTION OF USED COOKING & FRYING OIL

Features convenient side grip and large aperture for pouring the oil

Funnel bottom adaptable for use with various types of reused bottles

Complete with removable filter

GOCCIOLINA is a funnel for the collection of used domestic cooking and frying oil. Designed to facilitate the easy filling of used oil from pan to a re-used bottle; it has a wide aperture and a removable preliminary filter to prevent clogging.

To contain odour, GOCCIOLINA has a hinged lid, which is removable to facilitate cleaning. The flat lid may be silk screen printed or have a vinyl label attached. The design of the bottom of the funnel makes it adaptable for use with different types of bottles on the market, from small half-litre PET bottles to bigger ones with wider necks. The design mimics the shape of a drop of oil and makes GOCCIOLINA a fun kitchen accessory to have.

Available in several colour variations.

Options:
Vinyl labels, silk screen printing for customisation.

Only for filling with sealed plastic bottles

Large aperture

Supplied with labels with instruction for use

OLIVBOX 800 is a container for the separate collection of used cooking oil in sealed plastic bottles - not for loose oil.

The 800 litre volume container (ext. diameter 125 cm, int. diameter 105 cm, height 135 cm - approx.) can hold about 200-300 one litre bottles.

Once full, the base is pallet-fork shaped for easy movement and transport. The container is made in HDPE and resistant to damage from the weather and oil.

Available in two versions:

OLIVBOX 800 NEW, Code 02176/v - to be positioned near highways or at open strategic collection points, it is supplied with bars to protect the sides and ground anchors, to resist destabilisation by strong winds.

OLIVBOX 800 ISLAND, Code 02175/v - model without bars or ground anchors - suitable for managed site and multi-material collection points.

Option:
Vinyl labels

NON-SLIP PLATFORM
OIL ONLY 200

art.	dimensions cm	capacity L
02507/V	150x110x3,5H	/

OIL ONLY 200 NON-SLIP PLATFORM BUND FOR
OLIVIA 200 COLLECTION BUNKER

The non-slip grill guarantees maximum safety during oil filling

The platform can be easily removed

The OIL ONLY 200 non-slip grid platform is designed to increase user safety for access when filling the OLIVIA 200 Collection bunker with used vegetable oil from domestic containers, such as the OLI and ECOHOUSE containers. The platform is manufactured from pre-galvanized sheet steel, with accessories in hot-dip galvanized steel to provide excellent weather resistance and it includes holes for anchoring the platform to the ground. In the event of any accidental oil spillage, the grid together with three non-slip ramps, guarantees safe pedestrian access to users. The platform has special high oil absorbent yet water-repellent pads for rainwater diversion from holes in the bottom of the tray, in order to avoid water stagnation and unpleasant odours and insect infestation.

*The absorbent capacity of the pads is about 1.2 litres each, for a total of 12 litres per platform.

Replacement of the pads should be carried out in the event of any major spillage (max. approx. 10-12 litres) and used pads must be disposed of according to environmental regulations in force.

Replacement of the pads should be carried out in the event of any major spillage (max. approx. 10-12 litres) and used pads must be disposed of according to environmental regulations in force.

OLIVIA[®]200

CONTAINER FOR SEPARATE COLLECTION OF USED VEGETABLE OIL

200L

olivia 200

Completed with NCP cover and level gauge

Supplied with coded key closure

Large fill cover

OLIVIA®200 consists of two containers, one inside the other. The outer container approximately 500 litres, is made from oil and weather resistant HDPE. It is pressure washable and has a lid with a slam lock with coded key and lid support props for easy internal inspection. The inner corrosion resistant steel container has a capacity of 200 litres, a large opening for oil collection and a watertight clasp-sealed lid with oil resistant gasket. It can also be transported by road because it is authorised by UN/RID/ADR and approved for safe transport. It has a float level gauge with an analogue display dial and a manually opening lid with automatic closure and includes a ventilation and carbon odour filter (lasting approx. 2 years) to deter flies and rodents. It also has an anti-roll bar, a funnel to facilitate oil collection and a safety valve to prevent leakage in case the container is accidentally overturned or overfilled.
